Caring for the Whole Person Initiative is a collaboration between the California Catholic Council and the Alliance of Catholic Healthcare. It's vision is that: Persons in our congregations, communities, and hospitals are loved, wanted, and worthy, and will be prepared and supported in health and serious illness through the end of life. The goals of the initiative are: Parish members will utilize advance care planning, be informed about options for palliative and hospice care, and parish members be informed about Catholic teaching re: the experience of illness, acceptance /refusal of treatment, and dying. Parish leaders will learn how to create programs to support members who are sick or in a health crisis, so that their pain and symptoms are controlled to the desired degree, and they are satisfied and comfortable due to humanized environments.
